SECTION B – SCOPE OF SERVICES

Introduction

Various systems and tools are being used in managing different classes of data and daily operations of Yayasan Peneraju. Due to limitations of some of the systems and tools used, integration and data analysis and sharing are a pain point in Yayasan Peneraju ICT ecosystem.

Due to these limitations, Yayasan Peneraju wishes to replace it with a more comprehensive system that will combine and link the management of records and operations of Yayasan Peneraju that will cover each department functional area using a single integrated system and sharing of a common database.

The Enterprise Resource Planning system which is based on Microsoft Dynamics that we are looking for must provide the following modules that are interlinked to each other.

ii. Finance & Accounting module

iii. Procurement

Must cover the entire lifecycle of Yayasan Peneraju core Procurement processes inclusive of the tendering process and data from this module such as contract and tender information accessible by other modules. This module will also be used in managing information related to Yayasan Peneraju's vendors.

iv. Human Resources

This module needs to provide the ability to manage the process of recruitment all the way to separation/off-boarding. Managing employees' records, leave management, pay management and training are among functionalities needed in this module. Aside from those, employee self-service functionality must be provided.
